

The revenues of the Customs Administration in 2021 were higher by 1.1 billion euros or 21 percent compared to the previous year, the Director of the Customs Administration, Branko Radujko, said today.

“Revenues collected by the Customs Administration for the state budget in 2021 are higher than the previous one by 21 percent, ie by 1.115 million euros,” Radujko stated at the press conference.

He explained that the revenues are higher in relation to the record year of 2019, in which there was no pandemic, by 15 percent.

Such growth has been achieved, above all, by a strong insistence on the consistent application of laws and customs regulations, said Radujko, reports Tanjug.
